

Open for Business – Connected Worldwide

During these difficult times with restricted travel and face-to-face meetings ESC has risen to the challenge to maintain full support of its clients remotely.

ESC has been busy hosting HAZID, HAZOP, LOPA, FSA and FMEA workshops via video conferencing as well as training sessions and webinars with excellent feedback. In some instances, we've even seen an increase in productivity.

We are no strangers to remote working but now, more than ever, we want all our clients and partners to remain assured that ESC is fully operational, with no time zones limits.

Connected Worldwide

ESC has held remote workshops with:

- Saudi Aramco
- Total
- Wärtsilä
- Perenco
- Industrial Chemicals Limited
- Public Health England
- Caribbean Gas Chemical Limited
- Drax Power
- SEFI
- Metrohm
- QTRCO
- Celeros Flow Technology

Remote Platforms:

- Skype
- Zoom
- Microsoft Teams
- ClickMeeting
- Loopup
- Webex

Top Tips:

Our team of experts have posted weekly on our [blog](#) and [LinkedIn](#) pages sharing their experiences and top tips for working remotely, chairing and scribing for remote workshops.

If you'd like to know more, why not check out our [events page](#) and book on to one of our FREE webinars. If that doesn't fully quench your thirst for Technical Safety, maybe try one of our [training courses](#) (including the prestigious [TÜV Rheinland Functional Safety Program](#)), led by our own industry-renowned Functional Safety experts.

At ESC, our expert consultants are unashamed Functional Safety geeks and are always keen to help, so if you have a problem or query and are drowning in a sea of acronyms (HAZOP, SIL, SIF, SRS, SIS, SAR etc.), [drop us a line](#). It's what we do.
